SQUAT TO OVERHEAD PRESS MACHINE

FLUID
POWER
ZONE

FluidPowerPRESS is an industrial quality, concentric action Squat to Overhead press machine. The resistance is infinitely variable via the 10x Fluid Resistance mechanism, built into every FluidPowerZone machine and the unique semi isokinetic nature of our patented Twin Tank system.

The PRESS enables you to explode with high loads at high speeds, without having to deal with the eccentric loading unavoidable with most traditional forms of resistance exercise. This built in safety feature allows both the athlete competing for peak power and the deconditioned first time participant to achieve their fitness and strength goals without intimidation or injury.

The tapered shoulder pads, ergonomic hand rails and counter balanced press arm mean all exercisers can find a comfortable, secure training position without the need to make time consuming adjustments.
